### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 137,138,139,140,141,144,148,149,150 are rejected under 35 U.S.C. 102(e) as being anticipated by Schauerte.

Schauerte teaches a stent which is introduced intravascularly, and which senses a mechanical parameter such as blood pressure, as taught in paragraph 23, and is connected to a device which provides therapy such as electrical stimulation of selected tissues.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 151 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schauerte in view of Schwartz et al '463.

Art Unit: 3762

Schauerte teaches all of the subject matter of the above claim except the explicit use of drugs to improve biocompatibility. Schwartz teaches such in use with a stent. It would have been obvious to use such drugs to improve biocompatibility in order to prevent inflammation that frequently occurs when devices are chronically implanted in the body.

5. Claim 154 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schauerte in view of Silver '413.

Schauerte teaches all of the subject matter of the above claim except the explicit mention of eluting an active substance in response to a sensed blood sugar level. Silver teaches a stent which acts as a sensor and which, when the blood sugar is low, causes an implantable pump to elute an active substance. It would have been obvious to have this capability with the device of Schauerte in order to treat a wider variety of patients, such as those with diabetes.

***Allowable Subject Matter***

6. Claims 1-136, 155, 156 are allowed.
7. Claims 142, 143, 145-147, 152, 153 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
